

Multi-Wrap

Multi-Wrap

Industrial Grade Repair Tape No adhesives, self fusing, universal application

A remarkable, self fusing repair tape for any type of emergency repair. Multi-Wrap is made from a special high quality silicone rubber compound which adheres to itself under tension. Once cured it will provide a non conductive, air and water tight insulating seal onto almost any substrate.

Features

- Great temperature range of +260°C - -50°C
- Insulates to 400 volts/mil.
- Tensile strength of 600 psi
- Can be used on chemical, petrol, diesel, hydraulic, steam, salt water and acid leaks
- Safe to use on both ferrous and non ferrous substrates
- Cures within 2 minutes – permanent bond within 24 hours.
- Stops any kind of leak instantaneously
- Class H Insulator
- UV resistant
- Available in clear and black

Benefits

- Very easy to use
- No surface preparation necessary
- Economical and safe to use
- Ideal emergency repair tool.
- Does not need a dry or clean surface for application
- 8,000 volt insulation per un-stretched layer
- Air and water tight

insulator

Multi-Wrap

Industrial Grade Repair Tape

No adhesives, self fusing, universal application

Applications

Emergency hose repairs, hydraulic bursts, insulation repairs, extension cord connections, tools grips, air ducting joints, pipe repairs and bursts

Perfect for use in marine, home, maintenance, production and electrical applications

Very good anti corrosive properties

Safe on copper, UPVC and rubber applications

How to use

Clean off the surface to be repaired. Peel back a short length of the Multi-Wrap and apply around the substrate one layer of complete wrap over itself. Continue to wrap whilst stretching over the surface. More pressure resistance is obtained through more wraps of the tape. Cut off and apply pressure with your hand. Multi-Wrap will be a permanent cohesive bond within 24 hours and provide an immediate repair after a few minutes.
